

Year 2024 started for me leaving old company, and having a rest.

After, I joined new one.

They use fully automated AI based accounting software and they do not have any accountants.

I get what I get in terms of receipts.

I do not have paid vacation, so rest days are accumulated and negated as whole as salary payment at some month.

I get salary in some token denomination, pegged to USDC, and sell them from time to time, to USD, to EUR, and move into fiat onto Revolut. This process takes a substantial loss.
